

Procedure for paper submission to IWINAC

Step 1. Register as new author

Get an account in the submission web application

Step 2. Register a paper

Submit authors data and the PDF file of the paper

Step 3. View own papers

Submit the Latex2e sources of the paper in a compressed file. Latex2e sources are mandatory before acceptance for the publication of the paper in the IWINAC proceedings in the Springer Lecture Notes in Computer Science.

Detailed instructions

Step 1. Register as new author

In the welcome page of the [ConfMaster application](#) for the paper submission select “Register as new author”.

The screenshot shows the ConfMaster application interface. At the top, there is a red banner with a logo for 'Bio-Sciences Interplay Computation'. Below this, a navigation menu is visible with the following items: 'User: Guest', 'Register as new author', and 'Login'. The main content area has a yellow background and contains the following text: 'Welcome to the paper submission and reviewing site for the IWINAC conference!'. There are two input fields for 'Login' and 'Password', a 'Remember login?' checkbox, and a 'Login' button. At the bottom of the main content area, there are two links: 'Login or Password forgotten?' and 'Register as a new author'. The footer of the page contains the text 'The Conference Management System' and 'Copyright (C) www.ConfMaster.net, 2002-2014'.

In the “Register as new author” form you must include the required information. Once submitted the form (with all the fields marked with * filled in), an email will be sent to the email address provided in the form with the password generated by the ConfMaster application. All personal data, the login and the password can be modified later.

Submit

An email with your login has been sent to your address. After you have received the message with your login and password, you will be able to submit your paper, edit your data, and change your login and password. For complete instructions regarding submitting your paper and formatting requirements, please refer to the web site at IWINAC website.

If you have any questions, please contact the IWINAC organizers at Info@iwinac.org

Best regards,
The IWINAC Program Chairs

Welcome to ConfMaster - The Conference Management System for IWINAC

The Conference Management System Copyright (C) www.ConfMaster.net, 2002-2014

By selecting “Edit user data” it is possible to change contact information, login and the automatically generated password. Please be sure to keep track of your login and password if you choose to change it, because you will not receive a message with your changed data.

Step 2. Register a paper

After logging in the ConfMaster application, select the “**Register paper**” option in the start page. In this form, you must provide the title of your contribution, the paper type (regular paper or paper for one of the pre-organized sessions), the track (if you prefer oral or poster presentation; note that both kinds of presentations have the same relevance at IWINAC Conference) at least two keywords from the predefined list, the abstract, the authors and their email addresses, and the **PDF format file** (uncompressed) of the paper. Do not forget to check the box agreeing with the obligation for at least one of the authors to attend the conference and present the paper and stating that your paper describes an original research work not previously published.

Add new author

Is the primary author a student? yes no

Select file to upload (PDF only, max 5 MB): Ningún archivo cargado

By checking the box on the left, the author agrees with the following statements:

- I understand that acceptance of a paper means an obligation for at least one of the authors to attend the conference and present the paper at the IWINAC conference.
- This paper describes an original research work that has neither been previously published nor is currently under revision in any other conference or journal.

Thank you for your submission to IWINAC

Mail sent to contact author!

The Conference Management System Copyright (C) www.ConfMaster.net, 2002-2014

As previously mentioned, Springer requires Latex2e sources for publication of a paper in the Lecture Notes in Computer Science series. Therefore, the submission of a paper is not completed with the upload of the PDF file, but it is also mandatory the upload of the Latex2e sources. Please follow the instructions in the step 3 next.

It is not necessary for all authors to register as users in the ConfMaster application. Nevertheless, ConfMaster generates an account for each co-author automatically and it sends them an email with a login and a password. The co-authors can activate their own account logging in and completing their personal data.

Step 3. View own papers

The screenshot shows the IWINAC user interface. At the top left, there is a logo with 'Bio-Sciences', 'Interplay', and 'Computation'. Below it, a navigation menu lists options for 'User: IWINAC (iwinac)' and 'Author'. The main content area is titled 'List of own papers' and contains a table with the following data:

ID	Title	Paper Type	Keywords	Authors	Country				
	Titulo	Regular Paper	1.1.1 Tools ** 1.1.2 Mechanisms	IWINAC	ES				

Callout boxes point to specific actions: 'View details' points to the first icon in the action column; 'Update paper file PDF' points to the second icon; 'Download paper file PDF' points to the third icon; and 'Upload or update files: Latex Sources in a compressed file' points to the fourth icon.

In the “View own papers” option you can delete a previously submitted paper, view details of your papers, update and download submitted papers and upload or update the files associated to your papers. Modifiable paper details are its title, paper type, keywords and abstract. It is also possible to add or delete authors, modify the order of authors and change the contact author.

Use the “Upload or update files” option as the procedure to submit the Latex sources of the paper in only one compressed file (“tar+gzip” or “.zip” format) containing all the LATEX2e sources, including images. LATEX2e sources are mandatory for the publication of the paper in the IWINAC proceedings in the Springer Lecture Notes in Computer Science. Please note that source files for each paper must be submitted before acceptance of papers.
